

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | [linkedin.com/in/javinnieto/](https://www.linkedin.com/in/javinnieto/)

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne with a strong background in backend software development, API architectures, and data-driven systems. Proficient in Python and C/C++, with a proven ability to design scalable server-side solutions and manage complex technical projects autonomously.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained robust backend architectures and server-side systems using Django and MySQL.
- Spearheaded the backend development and API integration of a new module dedicated to user payment management.
- Contributed to the optimization of a comprehensive management system featuring 11 integrated modules.
- Collaborated effectively on software delivery, adhering to engineering best practices and agile methodologies.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Architected data-driven software and robust backend services for advanced AI and robotic systems.
- Designed and implemented data acquisition pipelines for real-time processing applications.
- Managed R&D engineering tasks independently, ensuring high system performance and reliability.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional communication model utilizing LoRa protocols for data transmission.
- Developed firmware and data handling routines for ground station communication systems.
- Documented technical specifications and experimental procedures following rigorous standards.

TECHNICAL SKILLS

- Programming: Python, C++, Matlab, HTML/CSS.
- Software & Backend: Backend with Django, RESTful APIs, Git, Linux, ROS, RTOS.
- Hardware & Systems: Microcontrollers (STM32/ESP32/AVR), PCB Design (KiCad), SPI, I2C, LoRa.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
