

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with a strong background in software development, data acquisition, and systems integration. Highly proficient in Python and database management, with a proven ability to analyze technical datasets and manage R&D projects from implementation to documentation.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained complex backend architectures and managed relational database schemas using Django and MySQL.
- Contributed to the maintenance, optimization, and data validation of a comprehensive management system featuring 11 integrated modules.
- Spearheaded the backend development of a new 12th module dedicated to user payment management.
- Onboarded and trained new team members on the tech stack and Scrum methodologies, improving team velocity and workflow alignment.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot based on the InMoov project, processing and analyzing dataset outputs from computer vision and sensor acquisition.
- Architected AI-integrated software and designed custom PCBs for advanced robotic systems.
- Conducted technical training programs in 3D Printing and Introductory Robotics.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa.
- Executed selection and integration of high-frequency (HF) electronic components.
- Integrated sensors using I2C and SPI communication protocols to ensure accurate telemetry data collection.
- Developed firmware for ground station communication systems.
- Documented experimental procedures, test findings, and raw data analysis methodologies.

TECHNICAL SKILLS

- Programming & Databases: Python, SQL (MySQL), C/C++, Matlab.
- Data & Software: Data Acquisition, Analytical Reporting, Backend with Django, Excel (Advanced), Git, Linux.
- Communication Protocols: UART, SPI, I2C, LoRa.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
