

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with a strong background in embedded software development and network-connected microcontroller architectures. Highly proficient in C/C++ programming and proven ability to manage technical projects from prototyping to implementation.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven robotic system utilizing data acquisition and computer vision.
- Architected integrated software and designed custom PCBs for advanced connectivity systems.
- Conducted technical training programs focusing on practical engineering and development workflows.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for payload data transmission using LoRa communication protocols.
- Executed selection and integration of high-frequency electronic components for robust connectivity.
- Integrated sensors using I2C and SPI communication protocols to streamline data flow.
- Developed firmware for ground station communication systems ensuring reliable data exchange.

Supervised Professional Internship

National Technological University (UTN) | Córdoba, Argentina | July – December 2023

- Developed the HEXSAR project: an autonomous robot for critical field operations.
- Designed and constructed control hardware and performed PCB prototyping.
- Programmed microcontrollers and implemented reliable sensor communication systems.

TECHNICAL SKILLS

- Programming: C++, Python, Matlab.
- Hardware & Design: PCB Design (KiCad), 3D Modeling (SolidWorks, Fusion 360), FPGA.
- Communication Protocols: UART, SPI, I2C, LoRa.
- Software & AI: AI Software Development, Backend with Django, HTML/CSS, GIT, Linux, ROS, RTOS.
- Embedded Systems & Firmware: Microcontrollers (STM32/ESP32/AVR), RTOS, Firmware Debugging.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
