

# Javier Nicolas Nieto

## Electronic Engineer

+61 458 319 336 | [javiernieto.ni@gmail.com](mailto:javiernieto.ni@gmail.com) | Melbourne, VIC 3000 | [linkedin.com/in/javinnieto/](https://linkedin.com/in/javinnieto/)

### PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne, bringing a strong foundation in software development, system integration, and API-based architectures. Proficient in C/C++, Python, and backend technologies, with proven ability to analyze technical requirements, design scalable interfaces, and troubleshoot complex system integrations.

### EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

### PROFESSIONAL EXPERIENCE

#### Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained robust backend architectures and API integrations using Django and MySQL.
- Contributed to the optimization of a comprehensive management system featuring 11 integrated modules, ensuring seamless data flows.
- Spearheaded the backend development of a new 12th module, designing reliable and secure interfaces for user payment management.
- Collaborated with cross-functional teams to refine system architectures and troubleshoot integration workflows.

#### Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa communication protocols and API-aligned data handling.
- Integrated sensors using I2C and SPI protocols, translating hardware signals into structured technical specifications.
- Developed firmware for ground station communication systems, ensuring secure and reliable data transmission.
- Documented technical solutions and experimental procedures to maintain high standards of system reliability.

#### Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot, utilizing data acquisition and system interoperability concepts.
- Architected integrated software solutions and designed custom hardware interfaces for advanced robotic systems.
- Conducted technical training programs, effectively communicating complex technical concepts to cross-functional peers.

### TECHNICAL SKILLS

- Programming & APIs: C++, Python, Django, RESTful APIs, Web Services.
- Software & Tools: Git, Linux, GIT, Backend Development, Middleware.
- Hardware & Systems: Microcontrollers (STM32/ESP32), Communication Protocols (UART, SPI, I2C, LoRa).

### LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
