

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with a strong analytical background in data acquisition, Python programming, and database structures. Proven ability to process complex technical datasets, design automated workflows, and deliver actionable insights for engineering and R&D projects.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained complex backend architectures using Django and MySQL, optimizing database queries and structuring datasets.
- Contributed to the maintenance and optimization of a comprehensive management system featuring 11 integrated modules.
- Spearheaded the backend development of a new 12th module dedicated to user payment management.
- Onboarded and trained new team members on the tech stack and Scrum methodologies, improving team velocity and workflow alignment.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot based on the InMoov project, utilizing advanced data acquisition and computer vision datasets.
- Architected AI-integrated software and designed custom PCBs for advanced robotic systems, analyzing sensor performance metrics to optimize system response.
- Conducted technical training programs in 3D Printing and Introductory Robotics.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa, analyzing transmission data to validate telemetry performance.
- Executed selection and integration of high-frequency (HF) electronic components.
- Integrated sensors using I2C and SPI communication protocols to collect and structure experimental real-time data.
- Developed firmware for ground station communication systems.
- Documented experimental procedures and analytical results systematically.

TECHNICAL SKILLS

- Programming & Databases: Python, SQL (MySQL), C++, Matlab, HTML/CSS, Git.
- Data & Analytics: Data Acquisition, Sensor Fusion, Data Modeling, Experimental Documentation, ROS.
- Hardware & Systems: PCB Design (KiCad), 3D Modeling (SolidWorks, Fusion 360), Microcontrollers (STM32/ESP32/AVR).

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
