

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne with a solid foundation in software development, data processing, and algorithmic problem-solving. Highly proficient in Python and C++, with proven experience in developing technical tools, organizing and cleaning complex datasets, and documenting workflows. Eager to apply computational skills to research-related software development and scientific computing.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained robust backend software using Python (Django) and MySQL, ensuring clean and well-structured codebases.
- Contributed to the optimization of a comprehensive management system featuring 11 integrated modules, handling data processing tasks.
- Authored clear technical documentation and trained new team members on workflows, ensuring high standards of code maintenance and reproducibility.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered functional data acquisition and communication systems, processing sensor data efficiently using I2C and SPI protocols.
- Developed firmware and software scripts to handle experimental data streams and manage ground station communication systems.
- Documented experimental procedures, analytical methods, and code implementations thoroughly to ensure research transparency.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed software tools for advanced robotic systems, integrating computer vision algorithms and data acquisition pipelines.
- Architected AI-integrated software solutions, translating complex technical requirements into functional software deliverables.
- Collaborated within multidisciplinary teams, effectively managing project progress and communicating technical results.

TECHNICAL SKILLS

- Programming: Python, C++, Matlab, Git, Linux.
- Software & Data: Backend Development (Django), Data Processing, Algorithm Implementation, Software Testing & Documentation.
- Hardware & Systems: Microcontrollers (STM32/ESP32), Communication Protocols (UART, SPI, I2C).

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
