

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Australia with a strong background in data acquisition, computational modelling, and engineering analysis using Python and MATLAB. Proven ability to manage multidisciplinary R&D projects, handle complex hardware-software integration, and apply strong analytical skills to solve engineering problems.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa, focusing on structural and functional testing.
- Executed selection and integration of high-frequency (HF) electronic components and performed rigorous engineering analysis.
- Integrated sensors using I2C and SPI communication protocols and documented experimental procedures for data accuracy.

Supervised Professional Internship

National Technological University (UTN) | Córdoba, Argentina | July – December 2023

- Developed the HEXSAR project: an hexapod robot for search and rescue operations, focusing on mechanical dynamics and control hardware.
- Designed and constructed control hardware, performed PCB prototyping, and implemented sensor communication systems.
- Programmed microcontrollers and applied computational tools to validate system performance and structural reliability.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot utilizing advanced data acquisition and computer vision systems.
- Architected integrated software and designed custom PCBs, ensuring robust hardware performance in complex environments.
- Conducted technical training programs and collaborated closely with multidisciplinary engineering teams.

TECHNICAL SKILLS

- Programming & Analysis: C++, Python, MATLAB, GIT, Linux.
- Hardware & Design: PCB Design (KiCad), 3D Modeling (SolidWorks, Fusion 360), Data Acquisition.
- Communication Protocols & Systems: UART, SPI, I2C, LoRa, Microcontrollers (STM32/ESP32).

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
