

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Detail-oriented Electronic Engineer based in Melbourne on a Working Holiday Visa, with a strong analytical background in software development, test execution, and system validation. Proficient in C/C++, SQL, and structured troubleshooting, with a proven ability to analyze requirements and ensure end-to-end quality objectives.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Analyzed system requirements and acceptance criteria to develop and maintain complex backend architectures using Django and MySQL.
- Executed thorough testing and optimization of a comprehensive management system featuring 11 integrated modules.
- Spearheaded the backend development and validation of a new 12th module dedicated to user payment management.
- Onboarded and trained new team members on testing frameworks, tech stack, and Scrum methodologies, improving workflow alignment.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and coordinated the validation process for an AI-driven humanoid robot utilizing data acquisition and computer vision.
- Architected integrated software and conducted systematic testing of custom hardware and robotic systems.
- Conducted technical training programs and documented operational procedures to ensure quality standards.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered and tested a functional model for CubeSat payload using LoRa communication protocols.
- Executed selection, integration, and verification of high-frequency (HF) electronic components and sensors using I2C and SPI.
- Developed and validated firmware for ground station communication systems, documenting all test procedures.

TECHNICAL SKILLS

- Programming: C++, Python, SQL, Matlab.
- Software & Testing: SDLC, Agile Methodologies, API Testing, Git, Linux, RTOS.
- Hardware & Design: PCB Design (KiCad), Microcontrollers (STM32/ESP32/AVR), Firmware Debugging.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
