

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with a strong background in software development, Python programming, and systematic testing methodologies. Highly proficient in debugging, problem-solving, and ensuring code quality across complex development lifecycles.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained complex backend architectures using Django and MySQL, focusing on high performance, reliability, and robust software quality.
- Contributed to the maintenance, debugging, and systematic testing of a comprehensive management system featuring 11 integrated modules.
- Spearheaded the backend development and quality validation of a new 12th module dedicated to user payment management.
- Onboarded and trained new team members on the tech stack, code reviews, and Scrum methodologies, improving team workflow alignment.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot based on the InMoov project, utilizing data acquisition and rigorous system validation.
- Architected AI-integrated software and designed custom PCBs, executing thorough troubleshooting and performance testing for advanced robotic systems.
- Conducted technical training programs and documentation to ensure high standards of quality and engineering practices.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa, executing structured testing and validation procedures.
- Integrated sensors using I2C and SPI communication protocols, performing thorough debugging and root cause analysis of system failures.
- Developed firmware for ground station communication systems and meticulously documented experimental procedures and test results.

TECHNICAL SKILLS

- Programming: C++, Python, Matlab, HTML/CSS.
- Software & Testing: Firmware Debugging, System Validation, Git, Linux, ROS, RTOS, Backend with Django.
- Hardware & Communication Protocols: UART, SPI, I2C, LoRa, PCB Design (KiCad), Microcontrollers (STM32/ESP32/AVR).

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
