

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne with strong practical expertise in robotics software integration, ROS, and embedded C++/Python development. Proven track record in developing autonomous systems, sensor integration, and bridging software stacks with physical robotic hardware.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot utilizing computer vision and advanced sensor integration.
- Architected robotic software stacks and designed custom hardware interfaces for advanced robotic systems.
- Conducted technical training programs and supported deployment workflows for automation and robotics projects.

Supervised Professional Internship

National Technological University (UTN) | Córdoba, Argentina | July – December 2023

- Developed the HEXSAR project, focusing on a multi-legged robot platform for search and rescue operations.
- Designed control hardware, performed PCB prototyping, and integrated real-world sensor communication systems.
- Programmed microcontrollers to handle autonomous routines, actuator control, and data acquisition.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional payload model using LoRa communication and embedded microcontroller architectures.
- Integrated diverse sensors utilizing I2C and SPI communication protocols for reliable data collection.
- Developed custom firmware for ground station communication and documented technical experimental procedures.

TECHNICAL SKILLS

- Programming: C++, Python, Matlab, Git, Linux, ROS, RTOS.
- Hardware & Design: PCB Design (KiCad), Microcontrollers (STM32/ESP32), Sensor Integration, Hardware Debugging.
- Communication Protocols: UART, SPI, I2C, LoRa, Serial Communication.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
