

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | [linkedin.com/in/javinnieto/](https://www.linkedin.com/in/javinnieto/)

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with a strong background in software development, database management, and system architectures. Highly proficient in Python and C++ programming, with a proven ability to collaborate on and implement practical, well-documented technical solutions.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained robust backend architectures and databases using Django and MySQL.
- Contributed to the maintenance, optimization, and bug-fixing of a comprehensive management system featuring 11 integrated modules.
- Spearheaded the backend development and API integration of a new 12th module dedicated to user payment management.
- Onboarded and trained new team members on the tech stack and Scrum methodologies, improving team velocity and workflow alignment.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Co-designed and developed AI-integrated software modules, utilizing Python-based data acquisition and computer vision libraries.
- Architected custom software-hardware integrations and communication protocols for advanced systems.
- Conducted technical training programs and documented complex system procedures for team members.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered and programmed a functional model for CubeSat payloads using robust communication systems.
- Integrated sensors and peripherals using structured communication protocols (I2C, SPI).
- Developed and debugged software for ground station communication networks.
- Thoroughly documented experimental procedures, system requirements, and technical guides.

TECHNICAL SKILLS

- Programming: Python, C/C++, MATLAB, Basic HTML/CSS.
- Software & Databases: Django, MySQL, Git, Linux, ROS.
- Hardware & Protocols: Microcontrollers (STM32/ESP32), PCB Design (KiCad), UART, SPI, I2C.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
