

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Melbourne on a Working Holiday Visa, with strong analytical skills and a solid background in data acquisition, system performance metrics, and information processing. Highly proficient in Python, SQL, and database management, with a proven ability to interpret complex datasets and turn them into actionable business insights.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Developed and maintained complex database architectures using Django and MySQL, ensuring high data accuracy and integrity.
- Contributed to the maintenance and optimization of a comprehensive management system featuring 11 integrated modules, analyzing performance metrics and trends.
- Spearheaded the backend development of a new 12th module dedicated to user payment management, translating business requirements into structured data solutions.
- Analyzed datasets and cleaned information flows to optimize reporting processes and improve overall system workflows.

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Designed and developed an AI-driven humanoid robot focused on data acquisition, pattern analysis, and computer vision metrics.
- Architected AI-integrated software and analyzed operational performance data for advanced robotic systems.
- Conducted technical training programs and documented data definitions and analytical processes for team members.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Engineered a functional model for CubeSat payload using LoRa, collecting and interpreting telemetry data from multiple sources.
- Integrated sensors using I2C and SPI communication protocols to validate and maintain consistent datasets.
- Documented experimental procedures and analytical processes to support clear reporting standards.

TECHNICAL SKILLS

- Programming: Python, C++, SQL, MySQL, Matlab.
- Data Analysis & Software: Data Querying, Dashboards & Reporting, Django, Git, Linux.
- Communication & Documentation: Technical Reporting, Process Documentation, Cross-functional Collaboration.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
