

Javier Nicolas Nieto

Electronic Engineer

+61 458 319 336 | javiernieto.ni@gmail.com | Melbourne, VIC 3000 | linkedin.com/in/javinnieto/

PROFESSIONAL PROFILE

Electronic Engineer (Honours) based in Australia with strong analytical skills, foundational data analysis capabilities, and a background in microcontroller architectures, data acquisition, and Python programming. Highly capable of collecting, organizing, and analyzing technical data to support evidence-based decisions, with a keen interest in MedTech innovation and multidisciplinary collaboration.

EDUCATION

- Bachelor of Electronic Engineering (Honours) | National Technological University | Córdoba, Argentina | Graduated: 2025

PROFESSIONAL EXPERIENCE

Technical Team Coordinator

Technology Cluster | La Rioja, Argentina | April 2025 – June 2026

- Collected, organized, and analyzed data related to advanced robotic systems utilizing computer vision and data acquisition pipelines.
- Engineered AI-integrated software and documented methodologies to support continuous improvement of technical processes.
- Communicated complex findings clearly through technical training programs and cross-functional team collaborations.

Electronic Engineering Final Project

National Technological University (UTN) | Córdoba, Argentina | August – December 2024

- Analyzed and validated data accuracy for CubeSat payload models using LoRa communication protocols.
- Executed data modeling and integration tasks utilizing high-frequency electronic components and sensor communication protocols (I2C, SPI).
- Documented experimental procedures and generated clear reports to communicate findings for ground station systems.

Backend Developer

AVEIT | Córdoba, Argentina | January - December 2024

- Analyzed business requirements and maintained complex backend architectures using Django and MySQL for data-driven management systems.
- Contributed to data organization and optimization across 11 integrated modules, supporting accurate information processing.
- Collaborated within cross-functional Scrum teams to streamline workflows and onboard new members on data stacks.

TECHNICAL SKILLS

- Programming & Data Analysis: Python, C++, Matlab, SQL.
- Data & Analytics: Data Modeling, Statistics, Data Acquisition, Data Cleaning.
- Tools & Documentation: Git, Linux, Technical Documentation, Spreadsheets.

LANGUAGES

- Spanish: Native.
- English: Advanced (IELTS Overall Band Score: 7 [C1]).
